

Shahcaad
Date juice and paste

Shahdaad Group, active in the field of selling and exporting high-quality date syrup and paste, is dedicated to offering the finest products in this industry to both domestic and international markets. The products supplied are sourced from selected date palm groves and are harvested and processed in full compliance with health and safety standards to ensure that consumers receive premium-quality, delicious, and delightful syrup and paste.

At Shahdaad, we are committed to the quality, taste, and health of our products, and we continuously strive to satisfy our customers by providing fresh and superior products.

Iran is one of the world's leading producers of date syrup and paste, boasting a wide variety of products. Given the significance of international markets and the export of these products for the country, Shahdaad endeavors to play an effective role in boosting economic growth and facilitating the introduction of Iranian producers' products to global markets.

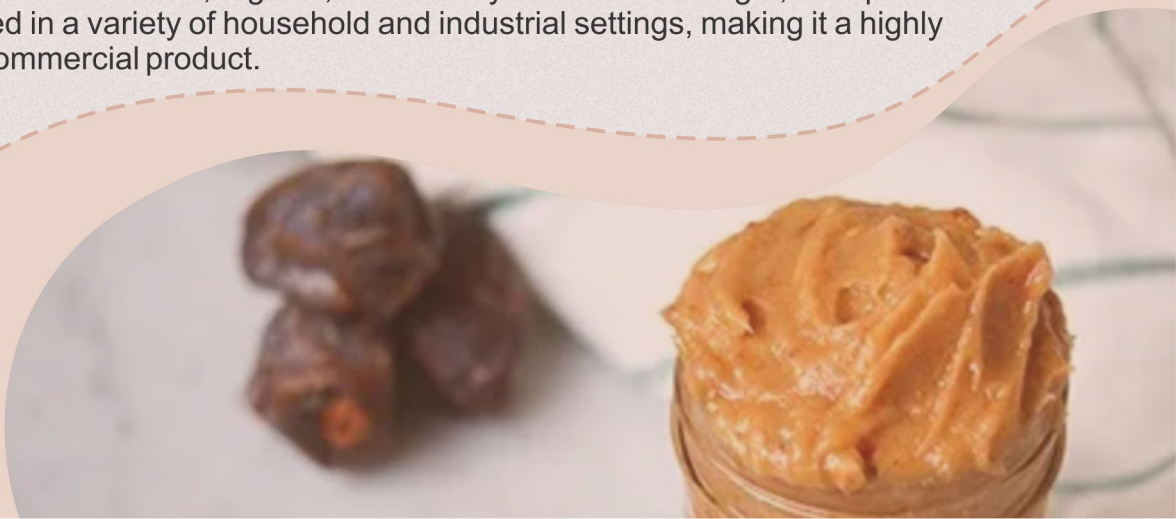

Product Types:

● **Date Syrup:**

Among the various derivatives of dates, date syrup stands out as one of the most significant, with a wide range of applications in both household and industrial use. Unlike whole dates, which have a relatively limited culinary application, date syrup serves as a beneficial, organic, and natural alternative to sugar and sweeteners, making it suitable for diverse uses. Due to its various applications, both as a key ingredient in the food industry and for direct consumption, date syrup holds substantial economic value and profitability.

● **Date Paste:**

Another essential date-based product is date paste, which, similar to date syrup, plays a crucial role due to its nutritional properties and versatile applications. As a natural, organic, and healthy substitute for sugar, date paste can be used in a variety of household and industrial settings, making it a highly valuable commercial product.

Applications:

● Household Use:

Date syrup and date paste, as natural sweeteners, can be **consumed directly** or used as substitutes for sugar in the preparation of various **desserts, pastries, cakes, cookies, jams, syrups**, and a wide range of other sweet food products.

● Industrial Use:

On an industrial scale, date syrup and date paste serve as key ingredients in the production of **various cakes, pastries, chocolates, nutritious and energy drinks, date sugar**, and similar products. Some of these derivatives are sold at premium prices in global markets, making them highly profitable products on an international scale.

Profitability:

The profit margin of these products depends on factors such as quality, demand volume, the producing country, and global pricing. Currently, given the high production volume of these valuable derivatives and their wide range of applications, the production cost and global market prices make these products particularly profitable, especially in the export sector.

Key Features:

● **100% Natural, Organic, and Free from Chemical Additives:**

Our products are made from the finest seasonal and fresh dates, ensuring exceptional taste and quality. They contain no preservatives, artificial sugars, or

chemical flavorings. The production process is carefully designed to preserve all the nutritional values of dates.

● **Competitive Pricing & Economic Value:**

Eliminating Intermediaries: By **offering direct supply from producer** to consumer, we have successfully reduced costs, allowing us to provide high-quality products at competitive prices.

Higher Value for the Price: While our pricing remains highly competitive, we never compromise on quality. Customers can enjoy premium-quality products

with a natural taste at an affordable price.

● **High Capacity & Ability to Meet Large-Scale Demand:**

With advanced production lines and reliable sourcing, we have the capability to produce and supply large volumes of date syrup and date paste on an industrial scale without any tonnage limitations, ensuring prompt delivery.

- Bulk date syrup is available in 20 to 30 kg gallon containers.
- Bulk date paste is packaged in 15 to 20 kg packs.
- Additionally, products can be supplied under various existing brands as per customer requirements.

● Organic date juice and paste ● No tonnage limit
